Giovani Irish Pascua

Reporting & Excel Automation · Data Analytics: SQL, Python, Power BI

gigpascua.25@gmail.com · Quezon City, Philippines · linkedin.com/in/gigpascua · github.com/gigpascua25

PROFILE

Reporting professional with 2.5 years of experience in UK pensions and administration at WTW. Prepare 15–20 monthly and 5 quarterly reports, deliver KPI and SLA reporting to UK project team leads, run data-quality checks, and design Excel VBA macros (coded with AI assistance) that cut preparation of two recurring reports from 5 hours to 1. Completed the Eskwelabs Data Analytics Bootcamp, covering SQL, Python, Power BI dashboards and LLM text classification with AI-assisted coding. Seeking a data analyst role.

SKILLS

Reporting & automation (work): Excel (pivot tables, VLOOKUP, data preparation) · Report automation (macro logic design; AI-assisted Excel VBA) · KPI & SLA reporting · Ad hoc reporting · Data quality checks, validation & reconciliation · Word mail merge

Data analytics (bootcamp, AI-assisted): SQL (PostgreSQL, Google BigQuery) · Python (pandas) · Power BI (dashboards, data visualization) · LLM text classification (OpenAI API) · Prompt design

Process & collaboration: Process improvement · Root-cause analysis · Process documentation · Stakeholder reporting · Presenting findings · Training · Jira

Tools: Oracle SQL · Supabase · Google Colab · Jupyter · Microsoft Office

Domain (financial services): UK DB & DC pensions administration · IAS 19 and cash flow data reporting · Benefits administration

PROFESSIONAL EXPERIENCE

WTW Manila Global Delivery Center Ltd. Company | Bonifacio Global City, Taguig — Apr 2024 – Present

Global delivery (shared services) center of WTW, a global advisory, broking and solutions company · UK pensions administration

Senior Associate – Benefits Administration — Apr 2026 – Present

Associate – Benefits Administration — Apr 2024 – Mar 2026

- Prepare 15–20 monthly reports, 5 quarterly reports, 5+ weekly tasks and ad hoc reports on UK pension administration for 77 schemes in three business groups, including IAS 19 and cash flow reporting data for accounts and trustee teams.
- Deliver KPI and SLA reporting to UK project team leads, including a monthly SLA report on 1,000+ billable cases for a banking client.
- Prepare and verify billable-case reports against system data before clients are billed, and check a 100,000-member movement report for missing or incorrect status codes, isolating 20–30 records for correction.
- Run prepared Oracle SQL scripts weekly to extract case-completion data for non-North America business groups and update the Excel source of the operations team's Power BI dashboard.
- Designed Excel VBA macros (coded with AI assistance) that cut preparation of the governance and membership-figures reports from 5 hours to 1, the leavers report from 1 hour to 15 minutes, and DC transfers file setup from 30 minutes to under 3.
- Designed a macro that prints and files query cases by reference number, cutting handling time from 45 to 30 minutes per member.
- Lead the team's post-mortem process review and investigate the root causes of UK error feedback; rewrote process notes for the 9 of 50 work types with the most UK error feedback, whose reports now consistently pass UK sign-off, and built an Excel tracker that flags notes due for revision.
- Authored process documentation for a newly onboarded client report, cutting processing time from 5 hours to 3.
- Rewrote the customer satisfaction survey procedure and trained the team on it; all members now complete it error-free on the first attempt.
- Clean and validate member data for monthly pre-retirement letters (Word mail merge) and for weekly mortality tracing to raise death cases.
- Train new team members on 7 processes and coordinate requests with UK and Mumbai teams through Jira.

DATA ANALYTICS PROJECTS

Eskwelabs Data Analytics Bootcamp · AI-assisted code, reviewed, tested and validated against source data · Portfolio: gigpascua25.github.io

Collections ELT Pipeline | Python, SQL, PostgreSQL (Supabase), Power BI — Sep – Oct 2026

Individual capstone · Role: sole analyst and developer

- Developed an ELT pipeline that loads 12 client contracts (74 columns) through raw, staging, core (31-table bootcamp model) and reporting layers, with business-rule checks, data-quality flags and 18 automated health checks per run.
- Built a 2-page Power BI collections dashboard and an automated weekly email (Python smtplib) for the Collections Lead, both from the same reporting views, flagging ₱853K overdue across 8 installments.

LLM Grant Tagging Pipeline | Python, OpenAI API, pandas — Sep 2026

Team of three · Role: Python developer (wrote the full pipeline)

- Built a GPT-4o mini pipeline that ranks the top 3 of 23 biodiversity targets per grant, each backed by a verified evidence quote; the correct target was shortlisted for 88.79% of 339 human-tagged grants.
- Added JSON validation, retries, checkpointing and human-review flags, then tagged 201 untagged grants.

AML Alert Prioritization | SQL (BigQuery), Python — Aug 2026

Team of six · Role: report writer and analyst (business context, executive summary and one of five investigations)

- Contributed to a team analysis of 2,618 anti-money-laundering alerts (995 never opened) that recommended a risk-based investigation queue.
- Compared money moved with declared income by occupation after standardizing occupation labels, identifying about 120 customers who exceeded declared income without triggering an alert.

E-commerce Discount Analysis | Excel, Power BI — Jul – Aug 2026

Team of six · Role: analyst and presenter (discounting hypothesis); dashboard co-designer

- Tested whether deep discounting explained four years of flat profit margins (one of five team hypotheses); found that sales discounted beyond 20% lost about $815K across 51,290 order lines, supporting a 30% discount gate.
- Co-designed 2 of 5 pages of the team's Power BI discount governance dashboard and contributed to a third.

EARLIER EXPERIENCE

Phoenix Petroleum Philippines, Inc. | Onboarding Merchant Acquisition Intern — Aug – Oct 2023

- Generated leads in target industries, onboarded merchants across digital platforms, and drafted responses to merchant inquiries and escalations.

EDUCATION & CERTIFICATIONS

Data Analytics Bootcamp, Cohort 23 — Eskwelabs · SQL, Python, Power BI, NLP with LLMs — Jul – Oct 2026

PMI Level 4 Certificate in Pensions Calculations (CPC) — Pensions Management Institute · 2 units passed: Leavers Without Special Circumstances; Leavers With Special Circumstances — May 2025

Bachelor of Science in Technical Communication — Mapúa University, Manila — Aug 2020 – Dec 2023

Leadership: President, Arts & Letters Student Council; Treasurer, Council of Presidents, University Student Government (2021–2022)
