Giovani Irish Pascua

Reporting & Excel Automation · Data Analytics: SQL, Python, Power BI

gigpascua.25@gmail.com · Quezon City, Philippines · linkedin.com/in/gigpascua · github.com/gigpascua25

PROFILE

Reporting professional with 2.5 years of experience in UK pensions and administration at WTW. Prepare 15–20 monthly and 5 quarterly reports, deliver KPI and SLA reporting to UK project team leads, and designed Excel VBA macros, coded with AI assistance, that reduced preparation time for two recurring reports from 5 hours to 1. Completed the Eskwelabs Data Analytics Bootcamp in SQL, Python, Power BI and LLM text classification, using AI coding tools and validating every output against source data. Seeking a data analyst role.

SKILLS

Reporting & automation (work): Excel (pivot tables, VLOOKUP, data preparation) · Report automation (macro logic design; Excel VBA coded with AI assistance) · Word mail merge · KPI & SLA reporting · Data cleaning & validation · Reconciliation

Data analytics (bootcamp, AI-assisted): SQL (PostgreSQL, Google BigQuery) · Python (pandas) · Power BI · LLM text classification (OpenAI API) · Prompt design

Process & collaboration: Process documentation · Stakeholder reporting · Training · JIRA

Tools: Oracle SQL · Supabase · Google Colab · Jupyter · Microsoft Office

Domain: UK DB & DC pensions administration · IAS19 and cashflow data reporting · Benefits administration

PROFESSIONAL EXPERIENCE

WTW Manila Global Delivery Center Ltd. Company | Bonifacio Global City, Taguig — Apr 2024 – Present

Global delivery (shared services) center of WTW, a global advisory, broking and solutions company · UK pensions administration

Senior Associate – Benefits Administration — Apr 2026 – Present

Associate – Benefits Administration — Apr 2024 – Mar 2026

- Prepare 15–20 monthly reports, 5 quarterly reports and 5+ weekly tasks on UK pension administration for 77 schemes across three business groups, including membership and payment data used by accounts and trustee teams for IAS19 and cashflow reporting.
- Deliver KPI and SLA reporting to UK project team leads, including a monthly SLA report covering 1,000+ billable cases for a banking client.
- Run the team's prepared Oracle SQL scripts weekly to extract case-completion data across non-North America outsourcing business groups, and update the Excel source file for the operations team's Power BI dashboard.
- Designed the logic for Excel VBA macros, coded with AI assistance, that reduced preparation time for the governance and membership-figures reports from 5 hours to 1, the monthly leavers report from 1 hour to 15 minutes, and the monthly DC transfers file setup from 30 minutes to under 3.
- Designed a macro that prints and files query cases by reference number for upload, reducing handling time from 45 to 30 minutes per member.
- Lead the team's post-mortem process review: rewrote process notes for 9 of 50 work types with the most UK error feedback, after which those reports have consistently passed UK sign-off. Built an Excel tracker that flags process notes due for revision.
- Authored process documentation for a newly onboarded client report, reducing processing time from 5 hours to 3. Rewrote the customer satisfaction survey procedure and trained the team on it; all team members now complete it error-free on the first attempt.
- Clean and validate member data from monthly pre-retirement extracts for Word mail-merge letters, and review weekly mortality-tracing data to raise death cases.
- Train new team members on 7 processes and coordinate with UK and Mumbai teams, raising and tracking requests in JIRA.

DATA ANALYTICS PROJECTS

Eskwelabs Data Analytics Bootcamp · Code written with AI assistance, then reviewed, tested and validated against source data · Portfolio: github.com/gigpascua25

Collections ELT Pipeline | Python, SQL, PostgreSQL (Supabase), Power BI Sep – Oct 2026

Individual capstone · Role: sole analyst and developer, from data loading to the dashboard and weekly email

- Developed an ELT pipeline that loads 12 signed client contracts (74 columns) through raw, staging, core (the bootcamp's 31-table model) and reporting layers, with 5 business-rule checks, 4 data-quality flags and 18 automated health checks on every run.
- Delivered a 2-page Power BI collections dashboard and an automated weekly collections email (Python smtplib) built from the same reporting views, identifying ₱853K overdue across 8 installments.

LLM Grant Tagging Pipeline | Python, OpenAI API, pandas Sep 2026

Team of three · Role: Python developer; wrote the team's full classification pipeline

- Developed a gpt-4o-mini pipeline that ranks the top 3 of 23 biodiversity targets for each grant, each with a verified evidence quote; the correct target appeared in the shortlist for 88.79% of 339 human-tagged grants.
- Added JSON validation, retries, checkpointing and human-review flags, and tagged 201 previously untagged grants.

AML Alert Prioritization | SQL (BigQuery), Python Aug 2026

Team of six · Role: report writer and analyst; wrote the business context and executive summary, and conducted one of the team's five investigations

- Contributed to a team analysis of 2,618 anti-money-laundering alerts, 995 of which were never opened, that recommended a risk-based investigation queue.
- Compared money moved with declared income by occupation after standardizing inconsistent occupation labels, identifying about 120 customers who exceeded their declared income without triggering an alert.

E-commerce Discount Analysis | Excel, Power BI Jul – Aug 2026

Team of six · Role: analyst and presenter for the discounting hypothesis; co-designer of the Power BI dashboard

- Investigated whether deep discounting explained four years of flat profit margin, one of five hypotheses the team tested; found that sales discounted beyond 20% lost about $815K across 51,290 order lines, and presented the margin-by-discount-depth analysis supporting a 30% discount gate.
- Co-designed 2 of the 5 pages of the team's Power BI discount governance dashboard and contributed to the design of a third.

EARLIER EXPERIENCE

Phoenix Petroleum Philippines, Inc. | Onboarding Merchant Acquisition Intern Aug – Oct 2023

- Generated leads in target industries, onboarded merchants across digital platforms, and drafted responses to merchant inquiries and escalations.

EDUCATION & CERTIFICATIONS

Data Analytics Bootcamp, Cohort 23 — Eskwelabs · SQL, Python, Power BI, NLP with LLMs Jul – Oct 2026

PMI Level 4 Certificate in Pensions Calculations (CPC) — Pensions Management Institute · 2 units passed: Leavers Without Special Circumstances · Leavers With Special Circumstances May 2025

Bachelor of Science in Technical Communication — Mapúa University, Manila Aug 2020 – Dec 2023

Leadership: President, Arts & Letters Student Council; Treasurer, Council of Presidents, University Student Government (2021–2022)
