PROFILE

Data analyst with 2.5 years of reporting and automation experience in UK pensions operations at Willis Towers Watson. Produce 15–20 monthly and 5 quarterly reports, deliver KPI and SLA reporting to UK project team leads, and built Excel VBA macros that cut report preparation from 5 hours to 1. Trained in SQL, Python, Power BI and LLM text classification through Eskwelabs' Data Analytics Bootcamp, where I built an ELT pipeline with automated data-quality checks, a Power BI dashboard and automated email reporting.

SKILLS

Data analysis & BI: SQL (PostgreSQL, Google BigQuery) · Python (pandas) · Power BI · Excel (VBA macros, pivot tables, VLOOKUP, mail merge) · Dashboards · Data visualization

Data pipelines & quality: ELT pipelines · Data modeling (raw, staging and reporting layers) · Data cleaning & validation · Reconciliation · Automated data-quality checks

AI: LLM text classification (OpenAI API) · Prompt design · AI-assisted coding

Reporting & process: KPI & SLA reporting · Report automation · Process documentation · Stakeholder reporting · Training

Tools: Supabase · Google Colab · Jupyter · JIRA · Microsoft Office

Domain: UK DB & DC pensions administration · IAS19 & cashflow reporting · Benefits administration

PROFESSIONAL EXPERIENCE

Willis Towers Watson Manila Global Delivery Center Ltd. | Makati City — Apr 2024 – Present

Senior Associate – Benefits Administration — Apr 2026 – Present

Associate – Benefits Administration — Apr 2024 – Mar 2026

- Produce 15–20 monthly reports, 5 quarterly reports and 5+ weekly tasks on UK pension operations and pension accounting (including IAS19) for 77 schemes across three business groups.
- Deliver KPI and SLA reporting to UK project team leads, including a monthly SLA report covering 1,000+ billable cases for a banking client.
- Run weekly SQL extracts of case-completion data across non-North America outsourcing business groups and refresh the dataset behind the operations team's Power BI dashboard.
- Automated recurring reports with Excel VBA macros: governance report from 5 hours to 1, membership figures from 5 hours to 1, leavers report from 1 hour to 15 minutes, and DC transfers file setup from 30 minutes to under 3 (in progress).
- Built a lookup tool that saves 2 hours on retirement case reports and a printing macro that cut query handling from 45 to 30 minutes per member.
- Lead the Speciality+ stream of the Post-Mortem Process Review team: rewrote process notes for 9 of 50 work types with the heaviest UK error feedback, after which those reports consistently passed UK sign-off. Built the Excel tracker that flags process notes needing updates.
- Wrote process notes for a newly onboarded banking-client report, cutting processing time from 5 hours to 3, and rewrote the customer satisfaction survey run guide so every team member now completes it correctly on the first try.
- Clean and validate member data from monthly pre-retirement extracts for mail merges and from weekly mortality-tracing data to raise death cases.
- Train new team members on 7 processes and coordinate with UK, Mumbai and Redhill teams, raising and tracking requests in JIRA.

DATA ANALYTICS PROJECTS

Eskwelabs Data Analytics Bootcamp · portfolio: github.com/gigpascua25

Collections ELT Pipeline (capstone, solo) | Python, SQL, PostgreSQL (Supabase), Power BI Sep – Oct 2026

- Built an ELT pipeline that loads 12 client contracts (74 columns) through raw, staging, core (31-table model) and reporting layers, with 5 business-rule checks, 4 data-quality flags and 18 automated health checks on every run.
- Delivered a 2-page Power BI collections dashboard and a one-click weekly collections email (Python smtplib) built from the same report views, flagging ₱853K overdue across 8 installments.

LLM Grant Tagging Pipeline (group; wrote all the Python) | Python, OpenAI API, pandas Sep 2026

- Built a gpt-4o-mini pipeline that ranks the top 3 of 23 biodiversity targets for each grant with a verified evidence quote; the correct target was in the shortlist for 88.79% of 339 human-tagged grants.
- Added JSON validation, retries, checkpointing and human-review flags, then tagged 201 untagged grants.

AML Alert Prioritization (group) | SQL (BigQuery), Python Aug 2026

- Analyzed 2,618 anti-money-laundering alerts, 995 of them never opened, and recommended a risk-based investigation queue.
- Wrote the business context and executive summary; compared money moved with declared income by occupation after cleaning inconsistent occupation labels.

E-commerce Discount Analysis (group) | Excel, Power BI Jul – Aug 2026

- Showed that sales discounted beyond 20% lost about $815K across 51,290 order lines, and presented the margin-by-discount-depth analysis behind a 30% discount gate.
- Designed the team's 5-page Power BI discount governance dashboard.

EARLIER EXPERIENCE

Phoenix Petroleum Philippines, Inc. | Onboarding Merchant Acquisition Intern Aug – Oct 2023

- Generated leads in target industries, onboarded merchants across e-platforms, and wrote responses to merchant inquiries and escalations.

EDUCATION & CERTIFICATIONS

Data Analytics Bootcamp, Cohort 23 — Eskwelabs · SQL, Python, Power BI, NLP with LLMs Jul – Oct 2026

PMI Level 4 Certificate in Pensions Calculations (CPC) — Pensions Management Institute · 2 units passed: Leavers Without Special Circumstances · Leavers With Special Circumstances May 2025

Bachelor of Science in Technical Communication — Mapúa University, Manila Aug 2020 – Dec 2023

Leadership: President, Arts & Letters Student Council; Treasurer, Council of Presidents, University Student Government (2021–2022)
